

ISIS - Recommendation #94

FORTTRAN code

2011-06-20 01:49 PM - Jake Sutliff

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	API	
Target version:	N/A	
Impact:		Software Version:
Description		
Much code is too old to compile under newer FORTRAN libraries Jac stated that an attempt to get it working under compilers would take a long time (based on experience working with Kris). To follow that thread, Tom stated at least 8+ weeks to convert most over to newer compilers. I would think more. Tom currently has about 5-10% of ISIS converted for ROLO. mitigation: Continue to use VM to compile ISIS2. Think about funding conversion of code to new compilers.
